### TURADAY, MARCH 93, 1697.

Subordinate Officers. The election of subordinate officers oc curred Monday and with one or two jexceptions the heads of departments were re-elected. The principal interest centered around the election of Chief of Police. It has been known for sometime that there has been a very bitter opposition to Chlor (Himan in certain quarters for no other reason than that he is an earnest and consistent Republican whore conception of pelitical duty led blue to remain faithful to his allegiance to the party of which he has always, been a member and to which he owes, his promotion to his present position. So far as the official duties of the office are concorned the city never has had a more efficient head of the Police Department, one in whom the propie reposed greater confidence. The ze election of Chief Gilman will give very general

satisfaction. This is also true of City Solicitor Ryder. The report that he had been aropped in the nominating cauena and a younger and less experienced lawyer selected for this important position was the subject of general criticism. Mr. Ryder has bren a dignified and most efficient legal adviser whose able opinions have beer highly commended. The City Council realized before it was 100 late that to fall ore-elect him would be a mistake and he as result the city will have the benefit of his services for the coming year In the Street Department Mr. James Gibbons takes the place of Mr. Charles Woodbury. In many respects Mr. Woodbury has been an excellent Commissioner and the change may ereate some dissatisfaction. Mr. Gibbons, however, will bring to the department a knowledge secured as a member of the Committee on Streets, in which capacity he served the past year, and is said to be; a map of good executive ability.

The other changes were the election of Rev. Mr. Pember as a member of the School Committee in place of Rev. Mr. Haley and Dr. McCann' lie the place of Mr. Taney, Mr. Warren A. Bragg as a member of the Water Board in place of Mr. cames H. Snow, Dr. Butler as City Physician and Capt. C. W. Vesz'e as Harbor Master.

The Hospital Resolve. In he Senate Monday afternoon amendments were offered to the resolve layor of the Eastern Malue Incane Rospital providing for an appropriation of \$73,000 for 1897 and \$100,000 for 1899 and dropping the commission. The re-

to've will come up for action at the ression today. The sopinion is expressed that the resolve in its amended form will pass the Senate and be sent back to the House. If this proves to be the case an spreement should be reached between tha two houses by which an appropriation may be secured at this session so that the work on the hospital may be,resumed at once. After two trials the House has falled to make any provision for the hospital. Now, if the Senate passes a resolve carrying an appropriation that will allow the work to continue so as to provide additional accommoda tions for the lesane, the House ought to get into line.

### Mayor Weeks

Last spring Mr. Hartwell, the Demoeratic landidate for Mayor in Oldtown was elected by one vote over Hon, E. B. Weeks one of the State Senstors from Penobscot County. This spring the Republicans turned the tables on the Demoerats and on Monday elected Mr. Weeks by fifteen votes over Mayor Hartwell. The Buard of Aldermon will stand as at present, six Democrats and four Repub-Beans: Inn Willo extends congratalations to the Mayor-elect and the Republicans of Oldtown on the victory won at

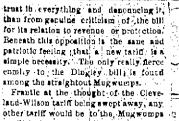

Better Join the Procession. In yew of the tremendous clashleg of party interests among the Democrats in this State last full, it is amusing to note the stigmpt of the oditors of the party organs to get back upon a coinmoniground by assailing the tariff in the regular old fashloned Democratic Janguage. It appears, however, that the Maine editors are behind the times. Licothe man who declared that he proposed to vote for Jackson regardless of the fact that he was dead, to these editors continue to shout free trade despite the fact that the party leaders have learned a not averse to protection. Even the South which insheretoforo been regarded as the one section of the country wedded to free trade theories so far as the Democratic party is concerned, now demands protection for its cotton.

Thus has a blow been delivered of the "knock-out" variety at the very vitals of the free trade argument, namely, free raw materials. Additional significance la attached to this demand for protection for Southern cotton from the fact that it was favored by four out of the six Democratic members of the Ways and Means Committee, including Mr. Balley, the Democratic leader on the Boor of the House, : While this frevolution is going on in Washington it is decidedly amusing to see the little Malne | contingent atill shouting for free trade slong the old lines. The Democratic brathren of the Makine press should wake up or the procession will leave them behind.

Referr og to this change of gentlment among the Democrata the Washington correspondent of the Chicago Record

correspondent of the Chicago Recordance in the movement of the younger members of the Congressional delegations from the South to secure a duty of 2½ cents a pound upon imported cotton. This indicates a new order of things, and a breaking away from the free-trade traditions of the oid Pamoeracy of that sacotion. It is noticed that he old, yeteranis are not engaged to these new departures, but only the younger; generation, the McLauren of Bouth Carolins; and Brantley, of Georgia. They icialm that, the importation of Egyptian option, cuts. In upon the sea island simple of the Atlantic coast. The Egyptian option, cuts. In upon the sea island simple of the Atlantic owner, and the large goods, and has a linter that the ordinary domestic product does not show. The section mean are taking of a combination with the woo growers and the lumber interests for methed redrantage. The wool mean agree to threw their votes for a day on sociou, provided the cocton mean will bring than several; youe from the South in the Seoate in support of the proposed suites of wool. The cotton mean any shoot that from any other of the proposed suites of which the support of the proposed suites of season is the adultors. 3. Binnek- at C. Swaat's, 28 Main St. \*\*\*\*\*\*

your name and address on a postell card, send it to Geo. W. Bert. Pribure Office, New York City, and sample copy of THE NEW YORK WEEKLY (TRIBUNE will be o alled to you. The heat-producing foods of winter leave the system clogged. Coulingment (in warm rooms, with lack of outdoor exercise, makes all the organs weak and torpld; Those who neglect to use a remedy or full to get the right one are inviting serious troubles. Most chroute diseases start in the spring. The end of winter finds thousands with such aymptoins as these: A general unfitness for work with either head or hands. A worn-out, tired-out-reeling that cannot be overcome. There is elceplessness, or restless sleep. Numbness of hands or feet. A sence of pressure in the head, with a feeling of gloom or despondency. There may, be fluttering or paintintion of the heart. Frequently a pain in the heart or under the left shoulder. There, may be rushes of blood to the head, or throbbing in the cars at times.

Kidney and liver troubles may be looked for if your digestion has not been perfect. There is fulness or pain In the right side, or pain under the right shoulder. Distaste for food, with mauses in the morning. Com-plexion is blotched of sallow. Tongue is coated or mouth foul. There is a dull, sleepy feeling, with disinclination to breathe deeply? It the kidneys are. in danger there will be pain, weakness, or soreness in small of back, and perhaps occasional sharp pains. Urine is acanty, high entored; and on atanding becomes cloudy, or deposits a red sediment. There are ap; to be requent headaches. Scres and skin emptions frequently come. ...

All these various symptoms are common to spring, and show that the vital ersana need renovating and prompt repair, o Bright's disease, jaundice, rheumatism, and neart troubles start from Sout such conditions as those. No two persons will have the same set of symptoms, but any of those enumerated are important. The organs must be strongthened and repaired. Repair only come through active digesbily on. It will vitaline the entire body and give you a spring of buoyant, viglives bearfs. Clear complexion, sharp With shift like purpose to do things, to Visiting of the

Young then sketched the pro- They have a due stoe ; ... grees that had been made since the be-

observation of the lines in the spectrum and said that the year 1800 was an epoch in the work of the solar spectrum and the time of giving a name to the spectroscope, the optical instrument for forming and examining apretrarso as to determine from the position of the specifal Items of Interest from Different lines, the composition of the substance. It was found that each substance made its own spectrum, although some aubstauces had two spectra. By means of the spectroscope, which received the aunlight, it was learned what substances. are to be found in the suc and thus far

situation is that a substance can ausor what rays it gives out.

Prof. Young vocally and through the stereopteon views, described the formation of the spectroscope, showing how it received the rays of light, and how the images are marked. From the spectroimages are marked. From the speciroscopic igns, we can tell the materials of tracted for last submirer, arrived in Elistucials as worth has substance, is composed and it worth hast work. Town Agent, John S. Williams.
